

Issue: Reification inside CONSTRUCT is not accepting breakline before partial statements

Create a graph.

```
CREATE GRAPH ?family, ?grandparents;
```

Insert some data into the graph.

```
INSERT DATA INTO ?family {  
  /u<joe> "parent_of"@[] /u<mary> .  
  /u<joe> "parent_of"@[] /u<peter> .  
  /u<peter> "parent_of"@[] /u<john> .  
  /u<peter> "parent_of"@[] /u<eve>  
};
```

1) Using ";" in CONSTRUCT for reification (partial statements, following docs - "bql.md" file).

p.s.: it is not accepting breaking the line before "both_live_in".

```
CONSTRUCT {  
  ?ancestor "grandparent"@[] ?grandchildren ; "both_live_in"@[] /city<NY>  
}  
INTO ?grandparents  
FROM ?family  
WHERE {  
  ?ancestor "parent_of"@[] ?c .  
  ?c "parent_of"@[] ?grandchildren  
};
```

Verify reification in the ?grandparents graph.

```
SELECT ?s, ?p, ?o  
FROM ?grandparents  
WHERE {  
  ?s ?p ?o  
};
```

Drop the graphs.

```
DROP GRAPH ?family, ?grandparents;
```

For the error with the ";" and the partial statement on the same line, look at:
